

UNIT-e Student Records & Tracking Solution (SRTS) Information Interface Professional Edition

UNIT-e SRTS Information Interface Professional Edition provides all the features and tools available in Standard edition plus the following;

Designer Tools

Enhanced Layout: Through the additional tools such as tabs and splitters, users have much more control over the layout of forms.

Enhance Field Properties: Through the additional field controls, users have more control over fields properties.

Spell Check: Enables developed forms and data entered to be spell checked using standard Windows™ dictionaries.

Data Fields

Colour-coded ListBox: Display the contents of a look-up with variable colours based on database values.

Tools-box

Tab control: Enables tabbed forms to be designed similar to UNIT-e Manager forms.

Table Control: Create table layout for better design layout of fields.

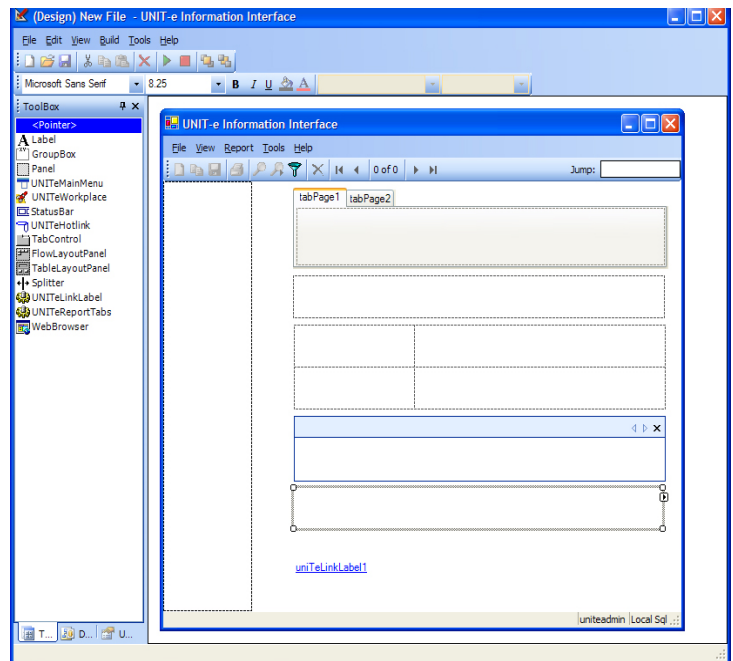

Flow Panel: Provides a rapid method of controlling the order in which fields accessed.

Web Browser: Embed standard web-pages within an information interface.

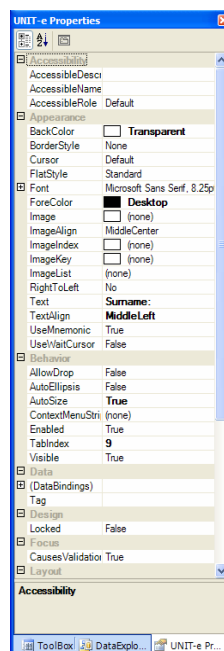

Report Tab: Embed reports such as standard crystal reports within the Information Interface.

Link Label: Create labels which are hyperlinks, ideal for thing like user defined help or procedures.

Splitter: Enables interfaces to be split with a resizable sliding bar enabling areas to be hidden or viewed.
