

## Welsh Further Education Statutory Returns

Simplifying the essential yet burdensome tasks that every Welsh Further Education College must undertake.

UNIT-e supports all DELLS statutory returns in line with the Lifelong Learning Welsh Record (LLWR) requirements. UNIT-e also supports the Welsh Staff Individual Record (wSIR) requirements and exploits the flexible curriculum module structures to model the Welsh datasets.

### Features

- UNIT-e supports both FE and Work Based Learning (WBL) LLWR returns and uses the flexible curriculum structure to produce data to DELLS requirements whilst minimising data entry and enrolment complexity
- UNIT-e provides flexible data entry screens (proformas) enabling colleges to define data capture layouts
- UNIT-e provides facilities to update data rapidly. Grid-edit tools enable fast error correction whilst warehouse routines enable regular data inconsistency checks and automatic rectification processes to be implemented

### Additional Benefits

- **EMA Management;** UNIT-e provides a module to support the management of the national Educational Maintenance Allowance (EMA) payments within England and Scotland and is ready to support the Welsh framework once it has been released by the National Assembly
- **Examination Processing;** The UNIT-e Examination system enables the loading of base data, candidate submissions and results upload with all GCE awarding bodies including the Welsh Joint Education Committee (WJEC)
