

CAPITA

Are you getting the most from your management information systems?

Are you giving your vocational learners the support they deserve?

e-Portfolio from Capita FHE can help you achieve business performance targets by improving your progress measurement and tracking systems.

All training organisations understand that when working with vocational learners, there are many different requirements and procedures to manage. Effective recording and management of data is essential to ensure that you receive the correct funding available and that your vocational learners have a straightforward route to successful completion and achievement.

The e-Portfolio solution from Capita FHE is a bespoke, online software application that has been designed to work hand-in-hand with vocational courses and learners. At the same time, it provides measured benefits to colleges and training organisations, saving on resources, reducing administrative burdens whilst boosting retention, achievements and income.

Evidence from the workplace can be gathered, submitted and assessed in real time through direct connections between the learner and assessor. With advanced functionality and visibility, verifiers can monitor submissions and learner progress to ensure quality standards are achieved and maintained throughout the process.

Orpington College saved an estimated £282,500 in their first year of using e-Portfolio from Capita FHE

The strengths of the e-Portfolio solution are recognised by significant bodies within your sector and it has quickly become the most accredited system on the market. e-Portfolio is currently accredited by SkillWise, ASET, IRRV, OCR, Education Development International, City and Guilds, Edexcel and the Royal College of Veterinary Surgeons.

Features:

- Fully integrated with UNIT-e and VQMT solutions from Capita FHE
- Entirely web-based
- Available 24/7
- Browser-based, intuitive interface, minimal training
- Multi-format uploads available for submission
- Highly flexible – e-Portfolio moulds to your business processes
- No hardware or software to install, minimises impact at your organisation
- No loss of data – secure, online project submissions cannot be lost in the post
- Real time audit trail – tracks learner and assessor progress

Benefits:

- Increased time available for assessment to be completed and marked
- Increased engagement with and ownership from learner
- Increases assessor case loads and throughput
- Reduced administrative, assessment and verification costs
- Reduced data entry
- Reduced reporting burdens
- Eliminates duplication
- Increases time to completion by up to 50%
- Increases income to training provider
